NOW—from COOK-WAITE

UNSURPASSED ANESTHESIA TO SUIT THE PROCEDURE

CARBOCAINE HCl 2%
Brand of mepivacaine HCl

with NEO-COBEFRIN 1:20,000
Brand of levo-noradrenaline

FOR LONGER LASTING ANESTHESIA In

- oral and periodontal surgery
- quadrant dentistry
- pulp canal work

Millions of injections in private dental practice as well as large scale clinical trials have proven the margin of safety and effectiveness of CARBOCAINE HCl.

The established 2% solution with NEO-COBEFRIN has demonstrated a wide margin of safety and is well tolerated as an oral local anesthetic. Very rapid onset produces deep, penetrating anesthesia of long duration. In both infiltration and regional anesthesia, there has been practically no evidence of failure.

CARBOCAINE with vasoconstrictor provides other advantages including ready diffusion into hard and soft tissues for control of pain.

It is particularly indicated in periodontal surgery when some degree of hemostasis is desired to produce a dry field. Because of its distinctive molecule, CARBOCAINE does not provoke allergic responses in patients sensitized to procaine.

CARBOCAINE HCl 3%
Brand of mepivacaine HCl

without vasoconstrictor

FOR SHORTER ACTING ANESTHESIA In

- those restorative procedures which high-speed techniques have shortened so dramatically
- simple extractions
- children's dentistry

One of the major advantages of new CARBOCAINE 3% without vasoconstrictor is that it produces deep anesthesia of relatively short duration by virtue of its own distinct constricting ability. It reduces soft tissue anesthesia by as much as one hour, a distinct advantage today in children's dentistry and in restorative procedures.

This new formulation is possible because CARBOCAINE is unique among dental anesthetics in that it consistently produces satisfactory anesthesia without the need of a potentiating vasoconstrictor. CARBOCAINE 3% without a vasoconstrictor has proven well tolerated. It achieves shorter duration anesthesia but is equally as effective as CARBOCAINE 2% with NEO-COBEFRIN, and produces significantly fast onset of anesthesia.

In simple extractions, CARBOCAINE 3% avoids the potential hazard of delayed hemorrhage and aids in the prevention of alveolitis since natural bleeding ensues immediately. It is also valuable in periodontal scaling where normal bleeding is desired.

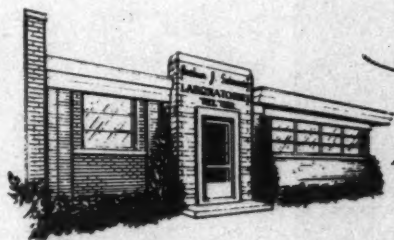

SUCCESSFUL PRACTICES NEED BOTH!

Contributions: Manuscripts should be typewritten, double spaced, and the original copy should be submitted. Every effort will be made to return unused manuscripts if request is made, but no responsibility can be accepted for failure to do so. Anonymous communications will receive no consideration whatever. Manuscripts and news items of interest to the membership of the society are solicited.

Forms close on the first and fifteenth of each month. The early submission of materials will insure more consideration for publication.

EXCLUSIVE

BERYLLIUM

gives Strength to TICONIUM Partials

You can't tell a good partial by its looks because most look alike. Ticonium is different! For instance, every Ticonium cast partial contains Beryllium, which provides superior strength and fine grain. Your Ticonium franchised laboratory can provide you with a Ticonium cast partial. Insist on Ticonium with Beryllium — it has added strength.

CROSS SECTION SHOWING HOW
STIM-U-DENTS FORM A PERFECT FIT
IN THE INTERPROXIMAL SPACES.

MAGNIFIED CROSS SECTION
OF STIM-U-DENTS SHOWING
POROUS, COMPRESSIBLE
STRUCTURE.

HERE'S WHY STIM-U-DENTS ARE SO EFFECTIVE

BECAUSE, WHEN MOISTENED, STIM-U-DENTS, BY REASON OF THEIR COM-
PRESSIBILITY, form a perfect fit in the teeth spaces not reached by the toothbrush.

When GENTLY MOVED BACK AND FORTH they produce a highly efficient
action to the interproximal surfaces, thereby promoting cleanliness and inter-
dental hygiene.

SIMULTANEOUSLY, the contacted teeth surfaces are cleaned and polished, food
particles that cause BAD BREATH and lead to DECAY are removed, and cervical
borders of fillings and crowns are rendered bright and clean and far less likely
to recurrence of decay.

STIM-U-DENTS are a valuable adjunct in the treatment of periodontal disease.

Simplified Radiographic Survey for the Handicapped Patient*

**Arnold D. Steinberg, D.D.S., Max L. Bramer, D.D.S. and Byron May, D.D.S.,
Michael Reese Hospital and Medical Center**

We dentists who work a great deal with handicapped patients, have long been aware that one of our greatest problems in the diagnoses and proper evaluation of these people has been our frequent inability to obtain adequate radiographs. Too often we were forced to accept blurred and incomplete pictures as a compromise. Sometimes children were taken into the hospital to have their dental work done under general anesthesia, when good radiographs would have shown that this was unnecessary. For this reason we of the Michael Reese Hospital Dental Department, division of the Handicapped, set out to evaluate various radiographic techniques and, if necessary, adapt them to our needs. Our aim was to be able to obtain a clear and all-inclusive x-ray survey of any patient no matter how difficult to handle and no matter what the degree or type of handicap.

We feel that the technique which we will describe has accomplished our objectives. Not only has it been a boon to those of us who work on handicapped patients, but the ease and simplicity of the technique makes it, we feel, an in-

valuable adjunct to any practice. Everyone has at times found in his practice a patient who due to trismus, severe gagging, extreme youth, and other similar conditions, has made it impossible to take good pictures of him. Now you can get x-rays not only of these people, but it is no longer necessary to work on any patient, even those requiring general anesthesia, without first getting a thorough, complete, and clear radiographic survey of his entire mouth.

Simply stated, the survey consists of a right and left lateral headplate and an upper and lower anterior intra-oral shot. (Fig. 1) Lateral headplates are not new. They were in quite common use many years ago and we are convinced that their use should never have been abandoned. Today it is primarily the oral surgeons who use them to observe gross pathology of the jaws, but they are not interested in carious lesions as we are here. We have therefore varied the angulation and placement of x-ray tube from that used by the oral surgeon and are able to obtain good detail of the teeth in the maxilla and mandible from the distal of the cuspids posteriorly.

The equipment necessary for taking the 5x7 lateral headplate is minimal. The only addition to the standard

*Presented during the Midwinter Meeting of the Chicago Dental Society, February, 1961.

65 KV dental x-ray unit and normal dark room equipment are; (a) either two 5 x 7 paper film holders or two 5 x 7 cassettes with intensifying screens; (b) two 5 x 7 film holders for developing; (c) 5 x 7 x-ray film. As can be seen the necessary equipment can easily be added to any dental office.

Although we have stated that lateral headplates can be taken using either paper film holders or metal cassettes, we have found the latter to be far better. The exposure time with the cassette is only $\frac{1}{2}$ second, 65 KV, 10 MA. When the paper film holder is used, the exposure time is increased to two seconds, 65 KV, 10 MA, an increase of four times the exposure time with the cassette. In these days of extreme awareness of the importance of restricting exposure to radioactivity to the smallest possible amount, this is obviously a significant difference. Another reason for our preference for the cassette is the uncooperative nature of the patients upon which it is used. The patients upon which we work cannot be held still for the two seconds necessary to expose the film in the paper film holders, and our prints were inevitably blurred. The only advantage to the paper film holders is that they will yield prints with much greater density if the patient can be kept still for the required period of time. This difference in density is due to the increased exposure time and the type of film used. In the cassette a standard 5 x 7 film is used whereas in the paper film holder 5 x 7 no-screen film is used.

Loading of either type of film holder is an easy operation. Simply insert the proper film being careful not to touch it. When using the cassette extreme care must be exercised not to touch the intensifying screens. Once fingerprints or scratches get on these sensitive screens they will appear on all subsequent radiographs until the screens are replaced.

For taking the lateral headplates, the patient is positioned in the chair so that he is sitting upright with the plane of occlusion parallel to the floor. The cassette or film holder is placed so that with the teeth in occlusion it is parallel to the long axis of the upper molars, the horizontal line across the center of the film holder should be parallel and in line with the plane of occlusion, and its center located at the mesial occlusal of the upper first molar. With the cassette or film holder in position, the head is tilted around 20° toward the horizontal and rotated enough to permit the placement of the x-ray tube just posterior to the posterior border of the ramus of the mandible around the gonial angle. This placement of the tube aims it at mesial of the upper first molar of the opposite side. (Distortions are eliminated by shooting as close to right angle to the cassette as possible). In most cases it is necessary for someone to hold the cassette for the patient. This assistant (in the case of a child, his parent) stands immediately behind the chair and once the cassette is in position holds it by pressing one hand against the back surface of the cassette. The free hand can

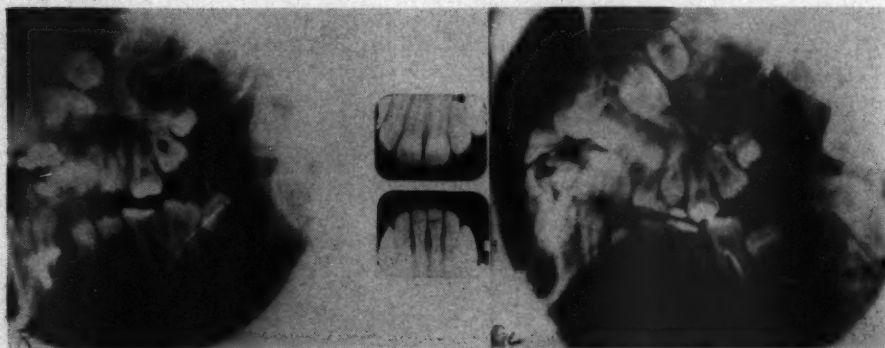

Fig. 1

then be used to stabilize the patient's head against the headrest of the chair by extending palm and fingers over the frontal area of the patient's head.

Although we were able to use the parents to hold the cassette, we soon learned that in many cases this wasn't enough. Holding the cassette and stabilizing the head of even a thoroughly sedated patient was too difficult. Another problem we encountered was an insufficient stability of the mandible, and since our patients were all uncooperative to begin with, many moved their jaws at precisely the wrong time. To alleviate these difficulties, we devised a cassette holder which when in place holds the film in the proper position. (Fig. 2)

To obtain the upper and lower intra-oral anterior views, we use a method with which, no doubt, many of you are already familiar. The patient is seated upright and the film is placed flat on the incisal edges of the teeth. The film is held in place frequently by the patient's own natural tendency to bite down on it. Otherwise we have an assistant hold it with his forefinger (in cases where this is likely to result in the loss of a finger, a hemostat is recommended). For the upper anterior the tube is placed at the tip of the nose at a 65° angle, while for the lower anteriors it is placed at the tip of the chin, and the chin is raised sufficiently to allow a 30° angulation.

The developing of the extra-oral film is exactly the same as that of the intra-oral film that is optimally at five minutes at 68° F.

We sincerely hope we have demonstrated to you the simplicity and value of this technique. Before we close we would like to point out a few other services which you can perform for your pa-

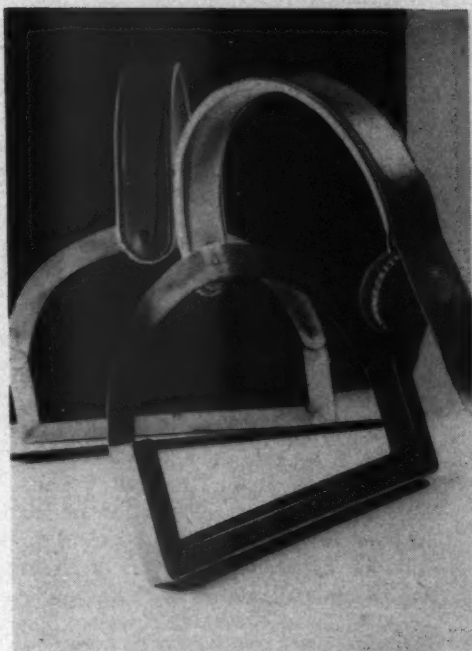

Fig. 2

tients by its use. Lateral headplates provide you with an unsurpassed opportunity to observe gross pathology of the jaw, detect suspected fractures, observation of all the permanent teeth in the young child, and observe third molar impactions. No longer need your radiographs be hampered in their efficiency by limitations of size, and no longer will you find it necessary always to refer patients out for any but the most ordinary x-rays. Our aim in this paper was to provide you with an all encompassing radiographic survey which could be used on even the most difficult patient. Our success depends upon you. You must now try it to prove its worth. We are convinced that once you do you will be amazed at its advantages.

IMPORTANT NOTICE

In accordance with the Constitution and By-Laws, all petitions for candidates for the elective offices of Chicago Dental Society must be filed at the office of the Chicago Dental Society by 5:00 p.m., March 17.

News and Announcements

PRES. LYNCH ON TELEVISION

James N. Lynch, President of the Chicago Dental Society, very ably presented the case for fluoridation of water supplies in an appearance on NBC-TV Saturday night, February 18th. He was joined in the presentation by another Chicago Dental Society member, Dr. John Bergmann, Director of the Division of Dental Health of the Chicago Health Department, and Mrs. D. Ann Sparmacher, R.N., Executive Secretary of the Chicago Council on Community Nursing. The program followed a one-half hour debate on the pros and cons of fluoridation between the Mayors of Grand Rapids and Atlanta.

THE FORWARD LOOK*

The new mode in false teeth, we are told, is the "forward look," which can make the wearer look considerably younger than his years. That's because the teeth are thrust much farther forward than old style dentures, and are built larger to fill out the mouth, thus returning to the face the round contour of youth and erasing the wrinkles of age.

Moreover, the appearance of youth is enhanced by more "life and translucent luster" in the teeth as a result of baking them by a new vacuum process that removes bubbles from the porcelain. Bubbles in porcelain absorb light and make the teeth seem dull.

The dentists who discussed progress in choppers at the Chicago Dental Society's midwinter meeting failed to enlighten us whether glamorous dentures make the wearer feel any younger. Presumably, a gentleman of, say, 50, sporting a new set of teeth that makes him look 25, should continue to act his age. After the first raspberry seeds get under the plate, he probably will.

*Reprinted from the Chicago Tribune, February 14, 1961.

TWO DAY PROGRAM IN APRIL

Another two-day program for CDS members similar to the very successful presentation in November has been announced by Graham O. Davies, Chairman of the Monthly Meeting Program Committee. On the 18th and Wednesday the 19th Mr. Tom Lawrence of Lawrence and Leiter, management consultants in Kansas City, will present a full course in patient motivation and case presentation. The charge for the second day of the course will again include luncheon.

YOUR DENTIST IS YOUR PAL*

Nearly 12,000 youngsters crowded into McCormick Place (another 24,000 were turned away because of lack of seats) for an afternoon of fun with the dentist. Along with the entertainment, the dentists provided free sugarless soda pop, milk, ice cream, apples, balloons, and, incidentally, free tubes of toothpaste and toothbrushes. One lucky child received a free pony, and two others won free cocker spaniel puppies.

It was the first observance of Children's Dental Health day, sponsored by the Chicago Dental Society.

The avowed purpose of the event was to make children more conscious of proper dental hygiene. Such events also may serve a more intangible, though nonetheless worthy purpose relating to what the Madison Avenue tub thumpers would describe as the dentist's "image."

Consider the frightened tot who has to be dragged to the dentist's office and forcibly installed in the chair because he regards the dentist and his whirring, menacing drill as hardly less than a torturing ogre. One can foresee the day when all this will pass.

Then the dentist will be viewed through youthful eyes in his new "image." The

(Continued on page 39)

Editorial

Hats Off to Chicago Dental Society's Dental Health Day

On Sunday afternoon, February 5th, 1961, a momentous event in the history of the Chicago Dental Society took place at the McCormick Place Convention Hall when Children's Dental Health Day was presented for the first time. To say that it exceeded the fondest dreams of our President Jim Lynch, General Chairman Ed Sullivan and Chairman Norm Olsen is the understatement of the year. In the original planning a crowd of 5,000 youngsters was the top figure but when 17,000 youngsters or more crowded every inch of the allotted space and an official estimate that 25,000 to 32,000 were turned away even the most fantastic dreams of the most optimistic were exceeded. 17,000 children were given a new image of the dentist, a friend, a man who can help every child to better health, a fellow who could enjoy the good fun with his child patients and friends, an image of a man who loves and is concerned about boys and girls.

Every child was given pungent health messages interspersed with wonderful entertainment which held everyone in rapt attention. There were apples, sugar-free beverages, milk products and milk, ice cream and hot-dogs and a lot of the other good things that all boys and girls enjoy so much when on an outing. There were health exhibits, nutritional exhibits, tooth brushing exhibits, exhibits by the armed forces denoting the importance of good dental health. On top of all this there were gifts for all—a real live pony, a couple of cocker spaniels, bicycles, cameras, pens, balloons and many other gifts which would delight the heart of any child. In addition there was top entertainment which thrilled all who saw it. And to make the day complete a Beneficent God watched over all our children so that no one was injured in the tremendous crowd, for which we give grateful thanks.

The writer could go on at great length to express our very deep appreciation to those individuals, and they are legion, who made possible this outstanding achievement but he is sure that it will be done in a more appropriate manner. All he will say is: Thank you from a very grateful profession for your dedication and devotion to a very wonderful cause, and to the better dental health of the youth of Chicagoland.

Now as a follow-up on the tremendous impact that this program has made on some 450,000 youth of Chicagoland, no doubt there will be a great influx of children seeking dental care and it is the writer's special plea that where humanly possible every effort be made to see that these youngsters receive the care they have been motivated to seek. If in your practice you do not take care of children, please, please try to arrange an appointment for them with a dentist who does. Even if you are booked to the hilt, take on a couple more and you will be richly rewarded by the knowledge that you have served that child well. If you, and you, and I will each do our fair share then the impact of Dental Health Day, February 5th, 1961 will have borne fruit and the Dentist Image of a Friend of Little Children will have been made more indelible.

Our Hats Off to the men whose vision and determination made possible Chicago Dental Society's Dental Health Day, 1961.—*E. Ebert.*

The Villa Moderne

Highland Park, Illinois

Skokie Highway and Lake Cook Road

Restorative Dentistry, Occlusion and Their Relationship to Periodontia

by Arthur E. Kahn, D.D.S., New York, N. Y.

1. Complete technique in use of tissue retraction tray method as used in operative dentistry.
2. The principles of tissue retraction and how to accomplish it.
3. Advantages in use of a completely versatile impression technique.
4. Functional diagnosis and case presentation.
5. Application of the hinge axis.
6. A chronological presentation of the handling of a full occlusal rehabilitation and criteria for treatment from start to finish utilizing whatever concept (and articulator) the dentist desires to use. The subject of occlusion both for equilibration of the natural dentition and in rehabilitation will be discussed. Also included will be the concept of tooth to tooth and cusp to fossa relationship and how to generate wax carvings for this method.

Registration	8:30 A. M.
1st session	9:00

News of the Branches

North Suburban

Yes, Sir! The Midwinter Meeting was something to talk about! Men from our branch played the big parts. Norman Olsen overfilled McCormick Place with kids. Jim (His Honor) Lynch waxed eloquent before the huge crowd at the general session in the Grand Ballroom. Ed Sullivan, as general chairman, and Grant MacLean as program chairman, with helper Chuck Mercier, were terrific. Adrian Swanson, Dick Fischl, Fred Verink and Orville Larsen were all in there pitching with their assignments. I was fortunate to see excellent clinics put on by Dick Renn, Zenas Shafer, Axel Pedersen, and Don Palmer. Couldn't see them all, but dozens of others from this Branch took part in a meeting that will long be remembered as one that was well planned and administered. Our hats are off to you, Jim Lynch! Even the "girl watching" was better this year. . . . As we looked around the meeting it seemed that every member of our branch was there all throughout the time, and this is good. . . . When I talked to George Paffenbarger from the Bureau of Standards, he had high praise for Grant MacLean with whom he had just counseled. . . . Ray Schulze was back from Clearwater, Fla., where he won the Senior Secretary's cup at the Biltmore Country Club. He is also a new grandfather. . . . Don Palmer also spent three weeks in Florida. While there he attended the Layman's Leadership Institute at the Fontainebleau Hotel with Billy Graham. . . . Bob Flynn is expecting in July! Says it will be a girl. . . . The Nominating Committee has met and the following slate is presented for next year: President, Charles Shaner; President-Elect, Paul Bass; Vice-President, George Kearns; Secretary, Grant MacLean; Treasurer, William Meek. A fine slate, worthy of top support. . . . It was nice to see our old friend Herb Midgley from

Pasadena at the Convention. Says he reads this column regularly. . . . Now, fellows, let's get ready for our own bang-up meetings Tuesday evening, March 14, and Wednesday, all day, March 15th. Mark these off on your calendar right now because Arthur Kahn is coming out from New York City to give us the dope on the Management of Hard and Soft Tissues in Indirect Impression Techniques on Tuesday evening. Then Wednesday he covers Restorative Dentistry, Occlusion and Their Relationship to Periodontia. These sessions will be at the beautiful new Villa Moderne and will start with a cocktail hour at 5:45, Tuesday. Dinner will be promptly at 6:45 and the program at 8:00. Next morning we begin at 9:00 on the head. We will have an hour and a half luncheon and finish at 5:30. By that time you should be "real schmart." Yes, Sir! This Branch is on its toes. How about you? We think you are also. Will see you there.—Floyd Grover, Branch Correspondent.

West Side

The Midwinter Meeting saw plenty of the West Side Branch. Among those present from the branch were Bob Tuck, Leo Cahill, Adolph Stark, Earl Boulger, George Blaha, Tom Burns, James Dillon, Lou Holzman, Sam Kleiman, Albert Levin, Joe Porto, Sam Rakow, Art Tessler, John Reilly, Walter Kelly, Walter Zipprich, and several others that don't come to mind at the moment. . . . The season is at hand also to select new officers for the next year. Selected by the Nominating Committee were: for President, George Walls; for Vice-President, Fred Carroll; for Secretary, Victor Ganz; Treasurer, Oscar Berman, and for Librarian, Josh Vission. These gentlemen will be voted upon by the branch members. . . . The branch was saddened by

(Continued on page 27)

CDS President Jim Lynch and Wheaties' Bob Richards, Master of Ceremonies at the Chicagoland Children's Dental Health Day share the mike at McCormick Center.

This picture of the crowd was taken just an hour *before* the show was
 scheduled to start. By this time the committee had stopped worrying about
 whether or not people would come out for a dental health program on a
 Sunday afternoon in midwinter.

We are only guessing but we *think* the prize pony is as happy as his new owner and those who are giving him away—big smiles—big happiness.

A part of the crowd at a crucial moment—almost everybody wound up with a balloon and, we hope, with some sound dental health information to take home.

A vociferous minority records her views—even the famous Clown Team from the Chicago Fire Department can't please them all!

No one is going to forget this lesson in toothbrushing do's and don'ts!

The little girl on Norman Olsen's right said in a note to the Society, "My sisters and I love the puppy we won and we feed it every day."

Cook County children learn that their dental health is an active concern of county authorities and inspect one of the mobile units that make it available to them.

"Dear Chicago Dental Society—I would like you to know that my children were fascinated by the wonderful floor show at the Dental Health Day . . ."

Stickney's "dental office on wheels" proves a happily harmless place to visit and view and get acquainted with all the shiny gadgets that can help you have a healthy mouth.

Milk is a good health food. One of the many educational exhibits that made Children's Dental Health Day a valuable as well as an enjoyable experience for our 12,000 guests.

Big city children find the prize pony utterly fascinating. Only mother, at the left, harbors misgivings about it as a prospective member of the family.

These healthy, happy singers were a popular part of the afternoon's entertainment.

Many learned that sugar-free beverages are good—good to drink and good to your teeth.

Milk products build healthy teeth—another educational display.

Uncle Sam stresses good dental health—another educational display—this one by the Dental Division of the Navy.

Announcing . . .

DENTOGENIC SEMINAR

by JOHN P. FRUSH, D.D.S., San Marino, California

DATES: Friday and Saturday, April 7 and 8

PLACE: Shoreland Hotel, Chicago

Registration application cards are being mailed to all members of the profession in this area. These cards may be returned directly to the Dentogenic Seminars or to the chairman of South West Dentogenic Forum, Charles P. Cosgrove, D.D.S., 68 East 138 Street, Chicago 27, Illinois.

Dr. Frush is a member of the American Denture Society. He is a member of the Postgraduate Staff of the University of Southern California, and has presented courses for the Dental Extension Program at the University of California at Los Angeles, and for Georgetown University, Washington, D.C., and the U.S. Naval Dental School, Bethesda, Maryland. He has given more than 150 seminars and symposiums on the subject of dental esthetics and has published many articles in dental journals on Dentogenics.

The historical significance of the esthetic trend in dentistry since 1889 offers a clear-cut choice of esthetic treatment to the dentist in private practice. The two schools of thought on the subject of dental esthetics are the mechanical, as laid down by Williams; and the Dentogenic, (which is the sex, personality, and age interpretation) into each dental composition. Both of these concepts will be thoroughly reviewed from the historical and contemporary point of view.

Of particular significance in today's trend toward Dentogenic considerations is the physiological factor, which opens to prosthodontic practice a precise method of determining function, vertical dimension, horizontal overjet, and vertical overlap. The method of achieving these critical measurements is thoroughly described and will be demonstrated with patients. The second day of the Seminar will include a full course on patient education and case presentation in prosthodontics.

the demise of Lou Postilion who was so well known on the west side. . . . Leo Cahill is looking toward the weather with a trip to Florida in mind. . . . Our President Walter Zipprich reports via our Program Chairman Carl Weese that the speaker for the March meeting will be from the First National Bank and will speak on Investments and Financing. The programs thus far have been excellent and promise profitable evenings to come. So try to make the last meetings of the year and help down the homestretch to a successful year. . . . See you.—*Andrew J. Kelleher, Branch Correspondent.*

Northwest Side

The Chicago Dental Society has just added another milestone to its long and memorable career as was justly evidenced by the recent Chicago midwinter meeting. To say that the meeting was a success is putting it very mildly, it was more than just successful—it was a tremendous testimonial of what a dedicated profession is capable of doing in a society where each individual member renders his utmost for the benefit of all. The boys of the Northwest side were well represented in the Academy of General Dentistry practically occupying all of the front seats at their meeting in the Blackstone Hotel. It was at this meeting that Admiral Shantz of the Naval School, Bethesda, Maryland, Dean Nagle of N.Y.U., and Dean Timmons of Temple Univ. were presented with honorary certificates of membership in the Academy. There were many comments about the caliber of clinics which had been offered to its members in the past. I am happy to say that plans are now underway for future postgrad courses. . . . We were all happy to see an old member Glenn Cartwright at the midwinter meeting. Glenn has always been a stalwart of organized dentistry and we certainly miss his presence at all our meetings. I hear that Jack Applebaum had his hands and pockets

Annual Seminar of the Northwest Dental Study Club

DENTAL OFFICE ADMINISTRATION

and the

DENTAL ASPECTS OF HUMAN RELATIONS

presented by

Miss G. Archanna Morrison

West Roxbury, Mass.

For those of you that missed the opportunity to hear Miss Morrison's outstanding program during the past Midwinter Meeting, this program designed for the Dentist, his Wife and his Assistants, was one of the high points of the meeting.

As an added bonus we will present

Mr. Perry Sandell

Director of Dental Health Education, American Dental Association, as special Luncheon speaker.

DATE:

Wednesday, March 29th, 8:30 a.m.

PLACE:

The new O'Hara Inn, Des Plaines, Illinois
(Readily accessible via all Tollways)

FEE:

\$15.00 Dentist
5.00 Each addition (Wife or Assistant)
This includes Luncheon and Coffee break

Advance Registration required

Did YOU get to the Conrad Hilton for the Midwinter Meeting? We've never before welcomed such a large and enthusiastic number of dentists at our exhibit booth. But, not every dentist, we realize, could make it. If you couldn't, reach for your phone and call us for a free copy of our NEW CATALOG that shows and describes the colorful Manhattan gowns that your fellow dentists came to see and buy. Every style, every material, every color is available at modest prices. THE PHONE IS WABash 2-0283.

You Spent \$450,000,000 on bowling last year!

13½ time as much as you gave to fight cancer. Shocking? Yes. And, here's another shocking fact: in 1961 cancer will strike in approximately two out of three homes. Go bowling; it's fun. But every time you spend 50¢ to knock down pins—give as much to the American Cancer Society—to knock out cancer!

full at the apple counter. An apple for the teacher is a good motto, as Jack probably headed for the many clinics being offered. The joviality and serious purpose of the meeting is behind and on we must go to our everyday practice.

... Margaret Serr, the wife of Ted Serr our branch president, recently returned from Florida. Poor Ted! After living it up at the midwinter meeting, he had to buckle down to the serious facts of life and hurry home to get things in order before his wife returned. Ah! those memorable days of bachelorhood were short-lived. In all seriousness it must be stated that even though Ted and Margaret enjoyed their brief separation there is still a lot of truth in the old adage that "absence makes the heart grow fonder." ... Both Sam and Mrs. Cole are mighty proud these days to see their son Morton Cole receive his Ph.D. in Bacteriology from Iowa State College. ... A brief note to serve as a reminder to the Northwest side membership. The branch meetings will again resume on Tuesday, March 7th, at the Chanteclair. The speaker for the evening will be Dr. George Holmes whose subject will be "The Future of Dental Practice." Sounds interesting, doesn't it? Plan on being in attendance for a most enjoyable evening.—*Chester L. Jasick, Branch Correspondent.*

Englewood

At this writing, the Midwinter Meeting is just over, and a myriad of Englewoodenheads are limping back to their offices for a little rest and recuperation. So many had responsible duties, it would be impossible in the space allotted to describe them. However, from director Jostes on down to ex-shoe shine boy Jaffe, everyone should be commended for a job well done. ... Evidently, Ray Anderson didn't get enough at the meeting, so he attended a three-day post-graduate course at Loyola, boning up on full dentures. Now you know where to send those difficult lower cases. ... Jack Manning blames bad companions for the late hours he kept at convention time.

However, he is very philosophical about it. He says, "It wasn't THAT apple that got the human race into trouble, it was THAT pair under the tree." . . . Harry Kazen's brightly burning port light didn't keep the State street cement divider from running him up on the shoals. Steering was damaged, but not the skipper. . . . Ed Hartmann's office was nearly burned by a big fire in an auto agency three doors away. He is contemplating a fire sale on extractions soon. . . . Ken Sharpe tells of meeting his old army C. O. who is now a brigadier general. Ken walked up just in time to overhear the general telling a senior dental student. "I think you'll like the army, I know I do." . . . Bruce Spooner tells the story he heard while "clinicing" in the Ol' South Room. The busy bartender listened for about five minutes while a customer described in great detail exactly how he wanted his martini mixed. After the lengthy explanation the barkeep wryly said, "Shall I stir it clockwise or counterclockwise." . . . Don't forget Englewood's first all-day seminar coming Wednesday, March 15th. Drs. Krol, Gieler, and Vermeulen will pool their talents to give us a complete course on full dentures. Call Bob Unger for tickets. . . . I close on the unhappy note of reporting the passing of Dr. Julius Jacobson who practiced for thirty years in Englewood. Also, Don Kellogg's father died February 5th. Don made the long trip home to Wyoming in spite of a very recent operation.—
Dan Duffy, Asst. Branch Correspondent.

West Suburban

Another milestone in dental history has come and gone. Yes, the 1961 C.D.S. Midwinter Meeting is a thing of the past; however, I am certain that its rewards of education and fellowship will always remain with us present and future. Would like to state that I certainly enjoyed seeing those of you whom I was fortunate enough to run into and want to thank all who handed me "news bits" during our brief contacts. . . . Among the

The "WONDER ELECTRIC MORTAR & PESTLE"

the Crescent
WIG-L-BUG

is known to dentists as the "wonder electric mortar and pestle" for good reasons . . . It IS a *wonder* because it mixes alloy and mercury smoothly, uniformly, and quickly. Because it is electric it replaces the old, out-dated mortar and pestle method so vulnerable to human error. Because of the Wig-l-bug's unique, oscillating, figure-8, mixing motion it completes mixes in 7 to 10 seconds.

Wig-l-bug mixes are fine textured, ready for insertion in the cavity. The result is a better, stronger, longer lasting filling every time.

Your investment in a Wig-l-bug pays dividends from the very 1st mix . . . Available in Beautiful Black (at \$55.50), Ivory White or Pure White (at \$60.50), and your choice of popular colors (at \$65.50 to 70.50) . . . See the Wig-l-bug at your dealer's.

For complete details see your dealer or write today.

1839 South Pulaski Road,
Chicago 23, Illinois

many class get-togethers, was one of special merit, the C.C.D.S. class of 1926 celebrated its 35th anniversary, February 5th at the Blackstone. Thanks to the hard work of Joe Voita, chairman, Al Mayer, and Tony Treybal, the affair was a tremendous success with eighty attending including wives. . . . Prior to the Wednesday dinner-dance, a most genial host and hostess, Joe and Mrs. Van Cura by name, served cocktails galore to a group of "Happy Goers" including J. Hudlik, L. Kulhanek, D. Chastek, B. Musil, F. Klepacki, B. Siegrist, G. Chott, A. Gierz, J. Hofrichter, W. Raczynski, yours truly, and respective wives. . . . Was my pleasure working with Bob Wirth on the registration and credentials committee during the meeting. I do hope your wife is once again in the best of health, Bob. . . . Was most sorry to hear of Dr. Milnarik's illness, do hope all is well by now. Also, Bill Stoffel weathered storm nicely after his flu involvements. . . . Congratulations to Rudy Weihe on opening of his new offices in St. Petersburg, Florida. Also to Frank Lucatorto on becoming a member of the Panel of American Association of Dental Examiners in Oral Diagnosis. Also, congratulations to Clarence Pikas and Joe Smejkal upon receiving 25-year pins with Berwyn Elks Lodge. . . . For our calendar of future events, we have our annual West Suburban clinic night on March 14th at the Oak Park Club, don't forget, this is also election night for our group. . . . Roundtable meets Monday, March 6th, with a program on Swisshedenture. . . . Oak Leaf Dental Study Club meets Friday,

March 3rd. Dr. Tope Maxson will speak on cavity preparations. . . . Far West Study Club will meet March 23rd with a talk on Oral Pathology by Dr. Richard Tiecke. . . . Also, a reminder of Far West Study Club's 2nd annual outing at Wagon Wheel on April 30th, May 1, 2, & 3. Contact chairman, Frank Novak for particulars. . . . Once again, we have exhausted our permitted space, therefore will leave you with a short quote from faithful "Perry Dentist"—"Well done is better than well said."—*J. V. Discipio, Branch Correspondent.*

North Side

Our previous FORTNIGHTLY REVIEW column was dedicated to several of our outgoing officers. This issue is designed to acquaint our membership with the qualifications of the Official North Side Branch nominees. Our nominee for Presidency of the Branch, William Semiloff graduated from N. U. Dental School in 1943 and spent 3½ years in the Army Dental Corps. He has been President and Program Chairman of the Uptown Forum. He has been Program Chairman, Insurance Chairman, Librarian, Secretary and Correspondent of the Branch. He has been a clinician for our C.D.S. Midwinter Meeting and is now a 6-year member of the General Arrangements Committee. Raymond M. Bro, our nominee for the Vice-Presidency, graduated from Loyola U. Dental School in 1940. He is a member of Delta Sigma Delta and Omicron Kappa Upsilon Fraterni-

ties. Ray served the U.S. Public Health Service for 6 years. As an active member of the Branch he has served on the following Committees: Insurance, Clinic Day, Nominating, Dinner and Attendance (Chairman in '59) and Prosthetic Service Chairman. He has served two terms as Librarian for our Branch. He served on the Registration and Credentials and Motion Picture Committees. He is also a member of the Academy of General Dentistry and the North Division of the Building Fund of Loyola Dental School. He has served on this faculty for three years. He has served several years as Trustee of his Church and was Professional Division Chairman of the Niles Township Community Chest in 1958. Richard Pipia, nominee for Secretary, was graduated from Loyola U. Dental School in 1956, is a member of Delta Sigma Delta and was a Navy dentist in the Marine Corps for two years. Dick served the Uptown Forum as Secretary-Treasurer, on the Branch Insurance Committee and was vice-Chairman of Clinic Day. He is a member of the American Society of Dentistry for Children and the Academy of General Dentistry. Max Chubin, after an active career in the West Side Branch where, since graduating from Loyola U. Dental School in 1934, he was Program Chairman three years, Ethics Chairman for four years, Secretary and President, is now our nominee for Treasurer. He has been the Chairman of the Professional & Public Relations Committee of C.D.S., on the Limited Attendance and General Arrangements Committees. He has been

Program Chairman and President of Uptown Forum and the Commander of his Veterans Post. He has also chaired the Program, Clinic Day and Workshop Committees of the Branch. Harry Greene, our official candidate for Librarian, graduated from U. of Ill. Dental School in 1934. He served with the Air Force from 1943 to 1946. He has been Program Chairman and President of the Uptown Forum. He was Clinic Day and General Arrangement Chairman for the Branch and has served on numerous committees of the Dental Society. Our outgoing President, Stanley Goldberg, is slated as a Director of the Branch. Stan received his D.D.S. and B.S.D. in 1938 and his M.S.D. in 1941 from Northwestern U. Dental School. He served in the Army from 1942 until 1946 and received the Purple Heart. He has been Chairman of the Public and Professional Relations Committee of the C.D.S. He has held all the offices of the Branch as well as serving on many committees. He has been an essayist before the C.D.S. and A.D.A. and many State Societies. He was Program Chairman and President of the Uptown Forum. He is a member of Alpha Omega Fraternity and Area Captain for N.U.D.S. Alumni Fund Drive. The three-year responsibility of Director to the C.D.S. is delegated to Paul Brown. A graduate of Loyola Dental School in 1941, he interned at Forsyth Dental Infirmary for Children and was Assistant Professor at his alma mater where he taught for ten years. A President and Regent of Alpha Omega, a member of Omicron Kappa Upsilon,

a clinician at A.D.A. and C.D.S. meetings and has served as Chairman of the Downtown Membership and Election Committees as well as Librarian, Correspondent and Director of the Branch. He is Vice-Chairman of the Combined Jewish Appeal. He was President of the Uptown Forum. . . . The election of officers is to be held at the next meeting of the Branch on March 14th. The Program of the evening is on an important and timely subject, "Organized Dentistry, Dental Health, Insurance and Legislation," to be presented by Bernard Conway, A.D.A. Secretary in charge of Federal and Dental Services and Legal Affairs.—*Paul Brown.*

Kenwood-Hyde Park

It's amazing how a misplaced comma could change the course of a man's life by depicting an altogether different meaning than had been intended; could a typographical error from an "a" to an "o" be almost as drastic? Believe me—Hal Block is not moving to 7265 South Exchange Ave., but Hal Black is, and Art Block is staying right where he is, and has no intention of moving. . . . We are all very happy to see Dave Torch back in the swing of things and we wish him good health always. . . . A cheery "Hello" to Sam Friedman and hope all is well. . . . Heard through the Grapevine that Dr. John C. Mackinson from Orlando, Florida, was here visiting his daughter who lives in Flossmoor. . . . Ben Gans was guest speaker for the South Shore Study Club meeting held at the home of your

Branch Correspondent. A very interesting and informative talk, Ben; thanks loads. . . . Mark off March 7th, Tuesday, for the next Kenwood-Hyde Park meeting where you will hear Dr. Charles Elliott, Professor of Clinical Speech Pathology at the University of Illinois, whose subject is "Semantics." Just this little word can spell the difference between success and failure, don't miss this one. Join us for dinner too. . . . Sid Berg has been elected Trustee of the Alpha Omega Fraternity of the National Group—Congratulations! . . . Asher Sherow spent ten rainy days in New Orleans, the sun hardly shone at all, better luck next time. . . . Bobby Herzberg spent ten days in Jamaica, enjoyed better weather than Asher. . . . Have also heard that Harold Stackler is now in Acapulco, Mexico, and enjoying himself. . . . Glad to see that most of the boys of the Kenwood-Hyde Park Branch were active at our very successful Midwinter Meeting. . . . Orchids to Jimmy Lynch, Ed Sullivan and all the committees for their wonderful successful meeting. . . . Ed Kozak active on Committees for the American Denture Society—Ed Kozak also the proud father of a bouncing baby girl. Congratulations to Mama and Papa! . . . Ed Schaaf is now a property owner and moved into his new home, now his Wednesdays and Sundays will be very busy. . . . Hope all of you came back from the Midwinter Meeting raring to go and all enthused with good dentistry—Aren't those apples good? Can't wait until next year. See you at the meeting. Keep well and happy.—*Morton J. Fireman, Branch Correspondent.*

NEWS AND ANNOUNCEMENTS

(Continued from page 12)

once frightened tot will lean back unrestrained in the chair to enjoy himself, content in the knowledge that the man in the white coat brandishing a shiny toy-like object is actually a jolly fellow, a purveyor of fun and toothsome goodies, who wouldn't hurt a fly and who just might have a pony or a puppy stashed away in a closet to reward good behavior.

Yes, sir, junior, the dentist is your friend. Now, open wide. This isn't going to hurt even a little bit.

*Reprinted from the Chicago Tribune, February 10, 1961.

I.D.H.A. MEETING

The Illinois Dental Hygienists' Association will hold its regular meeting on March 9th at Younker's Restaurant, 51 E. Chicago Avenue. If dinner is not desired at 7:15 p.m., attendance is invited for business and speaker at 8:15 p.m. The new officers and board members met on February 26th for their first board meeting; therefore, committee appointments will be announced at this regular meeting.—*Viola Johnson.*

I.D.A.A. SPRING MEETING

The Illinois Dental Assistants Association Spring meeting will be held May 8th through 10th at the Hotel Jefferson in Peoria, Illinois.—*Marcelle Meisenhelder, Publicity Chairman.*

C.D.A.A. NEWS

On January 19th, the Chicago Dental Assistants Association celebrated its 38th birthday with a capping ceremony, an informative speaker, and refreshments.

The next meeting of C.D.A.A. will take place on March 16th at the Palmer House, 8:00 p.m. Dr. John Anderson will talk on "The Dental Assistant, Indispensable to the Efficient Dental Practice."

North Side Branch of C.D.A.A. will meet on March 14th at the Villa Sweden Restaurant, 5807 N. Clark St. Dr. M. Santangelo will speak on "Radiology." South Side Branch will hold "The Bosses Night" on March 14th at Nielsen's Restaurant, 7840 S. Western Avenue. West Side Branch meeting will be held on March 14th at Otto's Restaurant, 7218 Washington St., Forest Park. Dr. Mark Watanabe will discuss "Orthodontia."—*Olga Tamarin, Publicity Chairman.*

MICHIGAN STATE MEETING

Members of the Chicago Dental Society are invited to attend the 104th annual meeting of the Michigan State Dental Association, April 10-12, at the Statler-Hilton Hotel in Detroit.

In addition to essay and study clinic presentations, table clinics, scientific motion pictures and scientific exhibits will be presented each day of the meeting.

Further information on the meeting may be obtained by writing the MSDA, 430 Stoddard Building, Lansing, Mich.

Swissedenture is many things . . . It is PEOPLE

The concept of Swissedenture is that every patient is an individual, and that no two are exactly alike. With a Swissedenture each patient's sex, physical personality and age characteristics are always carefully reflected, assuring the individuality of each restoration.

Our skilled technicians are specially trained and certified by the Swissedent Foundation to produce Swissedentures

according to your prescription. These craftsmen know that people display an infinite variety of smiles, and they take pride in the knowledge that the Swissedentures they produce are equally infinite in variety.

Yes, Swissedenture is people: the individuality of patients and the mutual quest for perfection by the Midwest Esthetics Forum and the profession we serve.

We, the members of the Midwest Esthetics Forum, pledge to maintain the highest standard of dental laboratory craftsmanship; to keep fingers on the pulse of all new advances in dental laboratory technology and, in consultation with members of the profession, to study these advances in an objective effort to determine their respective merits.

UNIFORMITY

...an important advantage
you get when you use

DEE GOLD

You start with a big advantage when you use DEE GOLD — Because DEE offers you a range of compositions that satisfies the special working and serviceability requirements of each specific use of gold in dentistry. There are compositions for all types of inlays, crowns and bridges, for wrought wire and cast partials.

But, equally important is this other big advantage — *unvarying* **UNIFORMITY**. This is obtained and maintained by the most exacting scientific control of DEE GOLD production. It means that every ounce of each and every DEE GOLD composition that leaves the factory, has the same properties — which in turn means you can count on the same satisfactory results every time.

SEND FOR THE DEE GOLD FOLDER

It lists the different DEE GOLD alloys with their physical properties and the uses for which they are suited.
